Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 6) ☐ Other: ____.

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the open top and the end portions of the handle must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Skrede.

The patent to Skrede shows a bait container 16 having upper, lower walls and an open top. Skrede shows a lid member 40 being hingedly attached to the container. Skrede shows a handle 29 pivotally attached to the container. Skrede shows bait storage members on each side of vertical partition 24 in Fig. 2. Skrede shows a floatation member 17 being disposed in the container noting Fig. 2 for floating the container. Skrede does not disclose floating the container upside down or right side up

for that matter. However, Skrede shows structure capable of performing the intended use. In reference to claim 2, Skrede shows an upper wall as the bottom wall of bait tray 20 having a plurality of holes 21 in Fig. 1.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Handa in view of Weightman.

The patents to Handa and Weightman show fishing bait containers. Handa shows a container 15 having side, upper, and lower walls. Handa shows a lid assembly with a lid 24 having a hinge 26 attached to the container and a lid support 36, 41, 42. Handa shows a handle assembly with a handle 50 being pivotally attached to the container. Handa shows a bait storage member 30, but it would have been obvious to employ more than one bait storage member for multiplied effect. See *In re Harza*, 124 USPQ 378. The examiner takes Official Notice that a plurality of bait storage members are old and well known. The patent to Weightman shows a fishing bait container having a floatation member A disposed in the container for floating the container upside down. In reference to claim 1, it would have been obvious to provide Handa with a floatation member as shown by Weightman for the purpose of using the bait container in water without possible loss due to sinking. In reference to claim 2, Weightman shows a

plurality of holes in upper wall portion F. In reference to claim 3, Handa shows air holes 52 in the side wall of the container.

Allowable Subject Matter

6. Claims 4-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Jacobs, Malone, Glasco, Koistinen, Wells, Koch, and Paar show other fishing bait containers.
